AUTOMOTIVE LEADER BOOSTS SAP PROCESSES BY 7X

Apexon enables richer SAP infrastructure and more powerful performance

As the world approaches an era of seamless connectivity and 5G enabled infrastructure, automotive and electronics firms are scrambling to uncover new competitive advantages in IoT, blockchain, and smart mobility.

This Automotive firm's SAP systems were long overdue for an upgrade and needed to be overhauled and restructured to suit their evolving business requirements.

THE RESULTS

KEY OUTCOMES

Adopting a multi-phase enhancement and rollout approach, Apexon empowered the customer with richer SAP infrastructure and more powerful enterprise performance metrics:

SAP BW REPORTING & CALCULATIONS ARE NOW 5-7X FASTER WITH REDUCED DATA LATENCY

24×7 MONITORING OF SAP APO

GREATER FLEXIBILITY IN RESOURCE ALLOCATION & CONSISTENTLY ACHIEVED SLAS FOR GRC, SRM, & ABAP MANAGED SERVICES

2 KEY AREAS

System upgrade
parameters included:

Development & Platform Enhancement

Development and platform enhancement to meet current and future business needs

Global SAP Rollout

Global SAP customization, rollout, and migration

3 KEY AREAS

By deploying a 30-member team of SAP specialists, Apexon was able to:

Deliver Managed Services

Deliver SAP managed services for SAP SRM, SAP APO – CIF, DP & SNP global support, and SAP security solutions

New Enhancements

Create and roll out new enhancements in RICEFW and BI/BO

Mitigate Data

Rollout SAP FICO and migrate the data across SAP modules
