AWS CLOUD STRATEGY

Put your AWS initiatives
on the fast track for success

aws

CLOUD IS THE DIGITAL ENABLER & AWS IS LEADING THE WAY

Cloud is an integral part of businesses' digital strategy and a huge enabler of increased innovation, speed and flexibility. Many companies are reimagining their businesses on the cloud by modernizing business processes, rethinking customer engagement, and in some cases, creating whole new channels for business and revenue.

AWS is at the forefront of this innovation, helping tens of thousands of businesses and millions of developers from all over the world to lower costs, become more agile, and innovate faster. AWS offers a wide variety of tools and services to help power these digital initiatives covering everything from compute, databases and infrastructure management to application development and security.

BUT SUCCESS IN THE AWS CLOUD REQUIRES A LOT MORE THAN MIGRATION

Despite widespread adoption and the introduction of "cloud first" business optimization strategies, many companies still struggle to gain the full value from their cloud efforts. It's not just the challenge of migrating workloads and operating those workloads with scale, resiliency, security, compliance and cost efficiency, but also leveraging the cloud in a way that makes a meaningful difference for the business today and in the future.

For these reasons, it is important for the organization to have a clear view of the role they want cloud to play in their business, where cloud can add the most value, who the key stakeholders are, and how to get there. It's much more than a workload migration map or implementation plan. It's about defining the what and the why behind your investment in cloud. And then putting the right cloud infrastructure in place to realize that vision.

AWS CLOUD DONE RIGHT

Apexon helps organizations of all sizes take full advantage of AWS to optimize their digital business plans in both the short and long term. With expert assessment, project scoping, blueprinting, and project planning, we enable businesses to get maximum speed, performance and reliability in their cloud environment.

OUR APPROACH

We take a strategic approach to implementing cloud consulting services. Our methodology involves a two-step process:

STEP 1

Assessment - Two weeks

In the assessment phase, Apexon works with your team to evaluate and determine the primary business use-cases for the cloud. We then explore suitable Cloud Solutions to meet your business and technical goals, experimenting with the same to validate feasibility and fit to deliver the expected ROI.

STEP 2

Planning - Four weeks

In the planning phase, we provide a cloud infrastructure design and implementation plan aligned to your business and technical goals and backed by detailed architecture. This includes a clear roadmap and strategic procedures for delivery.
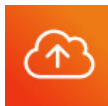

CLOUD EXPERTISE

Apexon's large pool of AWS certified consultants and engineers have hands-on experience architecting, building, migrating, and optimizing workloads to the AWS. This deep technical knowledge combined with AWS' and our own tools and techniques give businesses a distinct advantage with their AWS initiatives.

Apexon Cloud Maturity Model

Assessment of an organization's cloud adoption maturity and key gaps between defined business goals. Prescribes specific actions to address gaps.

Apexon Cloud Factory Model

A comprehensive model for workload qualification, quantification for migration planning.

AWS Well Architected Review (WAR) Framework

High-level best practices and guidance to optimize the way organizations build and maintain applications in the AWS.

AWS Pricing Calculator

Estimates and configures the cost for your AWS architecture to fit your unique business needs with the right AWS products and services.

Apexon has leveraged Cloud Maturity Model and Cloud Factory Model very successfully with AWS Well-Architected Review and devised highly efficient implementation tools and templates for cloud assessment requirements.

QMETRY

Apexon

Apexon is a pure-play digital engineering services firm focused on helping companies accelerate their digital initiatives from strategy and planning through execution. We leverage deep technical expertise, Agile methodologies and data-driven intelligence to modernize systems of engagement and simplify human/tech interaction.

We deliver custom solutions that meet customers' technology needs wherever they are in their digital lifecycle. Backed by Goldman Sachs and Everstone Capital, Apexon works with both large enterprises and emerging innovators — putting digital to work to enable new products and business models, engage with customers in new ways, and create sustainable competitive differentiation.
