UNLOCK BUSINESS VALUE WITH A DATA-DRIVEN MODERN ENTERPRISE POWERED BY THE SNOWFLAKE PLATFORM

ACCELERATE DIGITAL

Apexon is a digital-first technology services firm focused on accelerating business transformation and delivering human-centric digital experiences. For over 18 years, Apexon has been meeting customers wherever they are in the digital lifecycle and helping them outperform their competition through speed and innovation.

EMPOWERING USERS WITH ON-DEMAND DATA AT SCALE

Many analytics solutions create and rely on disparate data silos, increasing the complexity for IT professionals, and delaying time to value for business professionals who need data-driven insights, fast. A properly architected cloud data platform automates essential tasks — from how data is stored and processed to transaction management, security, governance and metadata management.

Apexon can help you become a data-centric organization through transformational data roadmaps suited for your unique business needs. As an experienced data services provider, we possess deep domain and technical expertise in handling vast and complex data systems at any scale. With Apexon, you can realize faster ROI on your data investments by addressing your specific data problems.

APEXON'S SNOWFLAKE OFFERINGS

Apexon offers end-to-end migration and implementation services for Snowflake Data Cloud including design, data preparation, re-platforming, and performance optimization. Specific capabilities include:

QUICKSTART TO SNOWFLAKE

Complete Snowflake roadmap with workshop and consultative approach

`Assessment` `Plan & Roadmap` `Reference Architecture`

Benefits:

- Precise estimate of total cost of ownership
- High business value use cases for implementation
- Migration roadmap based on business case
- Faster build to go-live time with accelerators

MIGRATION TO SNOWFLAKE

Driving data migration and business value with proven methodology, framework and accelerators

`Design & Build` `Migration Design Patterns` `Factory Model`

Benefits:

- Faster implementation
- Pre-built technology specific re-usable components to aid migration
- Migration COE body of knowledge for issue resolutions
- Go live faster and reduce process time with automated pipelines and QA

SNOWFLAKE IMPLEMENTATION

Enable modern data economy through managed cloud data solutions

`Business Use Cases` `Design` `New Data Cloud` `Advance Analytics & Insights` `Optimal Operations`

Benefits:

- Optimized data platform
- Enable data driven business decisions
- Unified data analytics experience
- Simplified data systems

SNOWFLAKE INTEGRATION

Rapidly integrate Snowflake into your data solutions and monetize

`API Integration` `Visualization & AI` `Extracts` `Virtualization`

Benefits:

- Faster business value
- Improved data consumption experience with storyboards
- Quicker business insights from heterogenous sources
- Seamless integration to AI
- Self service capability and reduce IT overheads

SNOWFLAKE OPTIMIZATION

Maximize Snowflake investment through continuous monitoring, optimization, and consumption management

`Define Boundaries` `Build & Deploy` `Service Delivery` `Steady State`

Benefits:

- SRE COE – body of knowledge to resolve hitherto architectural and other issues
- Yoy productivity improvement through automations
- Improved application reliability and resiliency
- Operational excellence through continuous YOY improvements
- Self service automation

APEXON & SNOWFLAKE

- Snowflake Select-Level Services Partner
- Headquartered in Silicon Valley
- 18 Delivery Centers Across Globe
- Backed by Goldman Sachs and Everstone Capital

HOW WE DELIVER

CLIENT-FIRST CULTURE

PROGRESSIVE DELIVERY

DATA DRIVEN USER EXPERIENCE

DISTRIBUTED AGILE GLOBAL TEAMS

DEEP EXPERTISE IN EMERGING TECHNOLOGIES

DISTRIBUTED AGILE GLOBAL TEAMS

UNIQUE ACCELERATORS FOR FASTER TIME-TO-MARKET

OUR FRAMEWORK & DATA ACCELERATORS

Hit the ground running with one of our frameworks, accelerators and prebuilt modules. Our accelerators can be deployed quickly, for quick ROI. Their modular design lays the groundwork for future technology initiatives.

iC4

A SUITE OF CLOUD NATIVE ACCELERATORS THAT ARE BUILT FOR AWS, AZURE & SNOWFLAKE PLATFORMS

M4

A PREDICTABLE FRAMEWORK FOR DELIVERING DATA PROGRAMS

- Self Service Extraction Framework, IC4 extension for automated and customized data extraction
- Snowflake Assessment Framework, for data landscape review
- C4-DQ Integration with Snowpark, IC4 integration with Snowpark for data quality
- Job Failure Prediction, AI powered failure prediction models to improve SLAs

OUR DOMAIN EXPERTISE

HEALTHCARE	LIFE SCIENCES	BFSI	MEDIA	AUTOMOTIVE	MANUFACTURING	SUSTAINABILITY
Health data cloud for patient diagnostics	Predict disease trajectories	Next Best Action	Customer 360	Connected cars	Reporting, transformation and analytics	Scenario analytics
Patient 360 for improved health outcomes	Accelerate drug discovery	Fraud detection	Viewership analytics		Supply chain optimization	Visualization dashboards
System interoperability	Scale commercial engagements	Regulatory compliance	Loyalty analytics and data monetization			
Optimized value-based care	Cloud genomics					

LEVERAGING MICROSOFT TO DELIVER INNOVATION & RESULTS FOR OUR CLIENTS

SUCCESS STORY

CENTURY-OLD DIVERSIFIED FINANCIAL SERVICES FIRM

- Delivered a highly scalable data platform utilizing AWS and Snowflake tech stack
- 10x increase in workload concurrency to increase the data availability for users
- Reduced TCO by migrating multi tera-byte data from on-premises to managed cloud data platform

SUCCESS STORY

LEADING FURNITURE RETAILER IN USA

- Apexon designed the underlying data architecture for the market analytics platform. This included a scalable, HD insight-based file system and data analytics solution built on Spark
- Helping the company and its partners simplify the delivery of insurance, risk management, employee benefits, and retirement services
- Apexon is ingesting insurance data to Azure SQL server storage using Spark processed data based on IC4 methodology

SUCCESS STORY

MACHINE LEARNING SOLUTION HELPS PRINTING COMPANY SAVE MILLIONS IN SHIPPING COSTS

- Optimized the cloud infrastructure to automatically transform raw data into an operable format before hosting it on Snowflake.
- Saved the company and estimated $4.2 million each year by using AI to optimize operations
- Complete visibility of mailing orders and their most recent locations through state-of-the-art portal
